English Test (30pts)

I- Read the following text carefully.

Preparing to perform

Christina Ricci is not a typical film star. She doesn't like Hollywood – the parties or the people. She is happier to live on the East Coast of the USA. "I love the people and the snow there," she says. Her ambition is not to be rich and **famous** but to be a good actress: "I want to be an actress, not a star." Christina always chooses interesting parts and often works in small, independent films.

People often ask Christina how she prepares for a new part and she finds that a really difficult question. She believes that an actor needs to know a lot about different sorts of people and different types of personalities. What if we have to play the part of someone who is **ambitious** and intolerant? Perhaps we aren't like this but we must understand how people feel and behave when they are. So, Christina watches people all the time, especially when she's preparing for a new part.

She believes that the costume is also very important when she's acting. Clothes are really important to all of us. They tell other people a lot about who we are and who we aren't. Different clothes can change our behavior. Think about it. When we put on party clothes, work clothes or sports clothes we change a little. For example, in smart, **expensive** clothes we look good, we feel good and we are more **confident**. That's why wearing a costume is important for Christina when she's acting. If she puts on the clothes of an old, poor homeless woman, she feels more like her. The moment Christina puts on the costume, she changes and for a short time she's another person.
