

CHANCE (CHILDREN AGAINST CANCER)
Based on Volunteer Work and Donations.
License number 52/AD

Raising Awareness for Childhood Cancers

- 15,270 children per year are diagnosed with cancer
- 40,000 children undergo treatment for cancer each year
- Despite high cure rates, childhood cancer still kills more children in the world than any other disease
- An estimated 1,400 children lose their battle with cancer every year

EARLY DIAGNOSIS SAVES LIVES

There is severe lack of awareness and young lives are being lost due to late diagnosis. We aim to change that by ensuring that all parents and health care professionals are aware of the signs and symptoms of cancers that affect children, teenagers and young adults.

The fact that you are reading this means that you are already better informed about childhood cancers.

CHANCE Association Mission and Aims

- Help children diagnosed with cancer and serious blood disorders obtain the best medical care available regardless of the family's financial condition.
- Provide psychological and emotional support to the families.
- Improve health conditions of people suffering from cancer and blood disorders.
- Organize educational, cultural and entertainment activities for the children diagnosed with cancer or blood disorders and their families.
- Increase public awareness and do nationwide educational campaigns for early detection and better prevention.

Know the Main Signs and Symptoms of Childhood Cancers

Continued, unexplained weight loss. Constant infections or recurrent persistent fevers of unknown origin

Headaches, often with early morning vomiting. Increased swelling or persistent pain in bones, joints, back or legs. Lump or mass especially in the abdomen, neck, chest, pelvis or armpits

A whitish colour behind the pupils

Non traumatic bruises

Constant tiredness or noticeable paleness

Eye or vision changes which occur suddenly or persist

Please visit our social media to learn more about the signs and symptoms of childhood cancers.

This card is designed to highlight the main signs and symptoms of cancer in children and young adults. However, **you** know **your** child better than anyone else. If you are unsure about **your child's health**, please seek medical advice. An early diagnosis can **save your child's life or the life of a child you know.**

This awareness card is supported by an educational grant from :
